WEATHER OF CONCERN

Weather of Concern

- Southern California: A strong Santa Ana weather pattern will develop late Thursday night and bring strong Santa Ana winds late Thursday night through Saturday. Gusty northeast winds will surface in the mountains late Thursday night, and funnel through the mountain passes into the foothills and valleys. Strongest winds in Orange county and southwest San Bernardino county will occur late Thursday night through Friday morning, while the strongest winds for San Diego and Western Riverside counties will occur Friday morning through Saturday afternoon.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/www_bc_cal.php

Key Points

12/1 – 12/7

Thursday

- No significant weather hazards expected.

Friday-Saturday

- Strong and gusty Santa Ana winds for the S. CA mountains (strongest Friday night-Saturday morning); moderate fire weather danger.
- Additionally: Strong winds over the Sierra Nevada (mainly Friday); possible impacts to travel over passes.
- Cold temperatures inland valleys (potential impacts to crops), mainly San Joaquin Valley.

Sunday-Wednesday

- Increasing chances for rain and mountain snow in northern CA (mainly northwestern CA) beginning Sunday. Light snow may produce locally hazardous road conditions (mainly Sun-Mon in northeastern CA).

California OES Impact Threat Matrix

Dec 1 - 7, 2016

DAY/THREAT	THU	FRI	SAT	SUN	MON	TUE	WED
Fire Weather

	High Threat
	Moderate Threat
	Slight Threat
	No Discernible Threat

Day 2-3 Weather Hazards

Valid: 0800 Fri – 0800 Sun

Strong winds over the Sierra Nevada (mainly Friday)

Strong, gusty winds (Santa Ana); moderate fire danger

-  High Threat
-  Moderate Threat
-  Slight Threat

WEATHER SYNOPSIS BY REGION

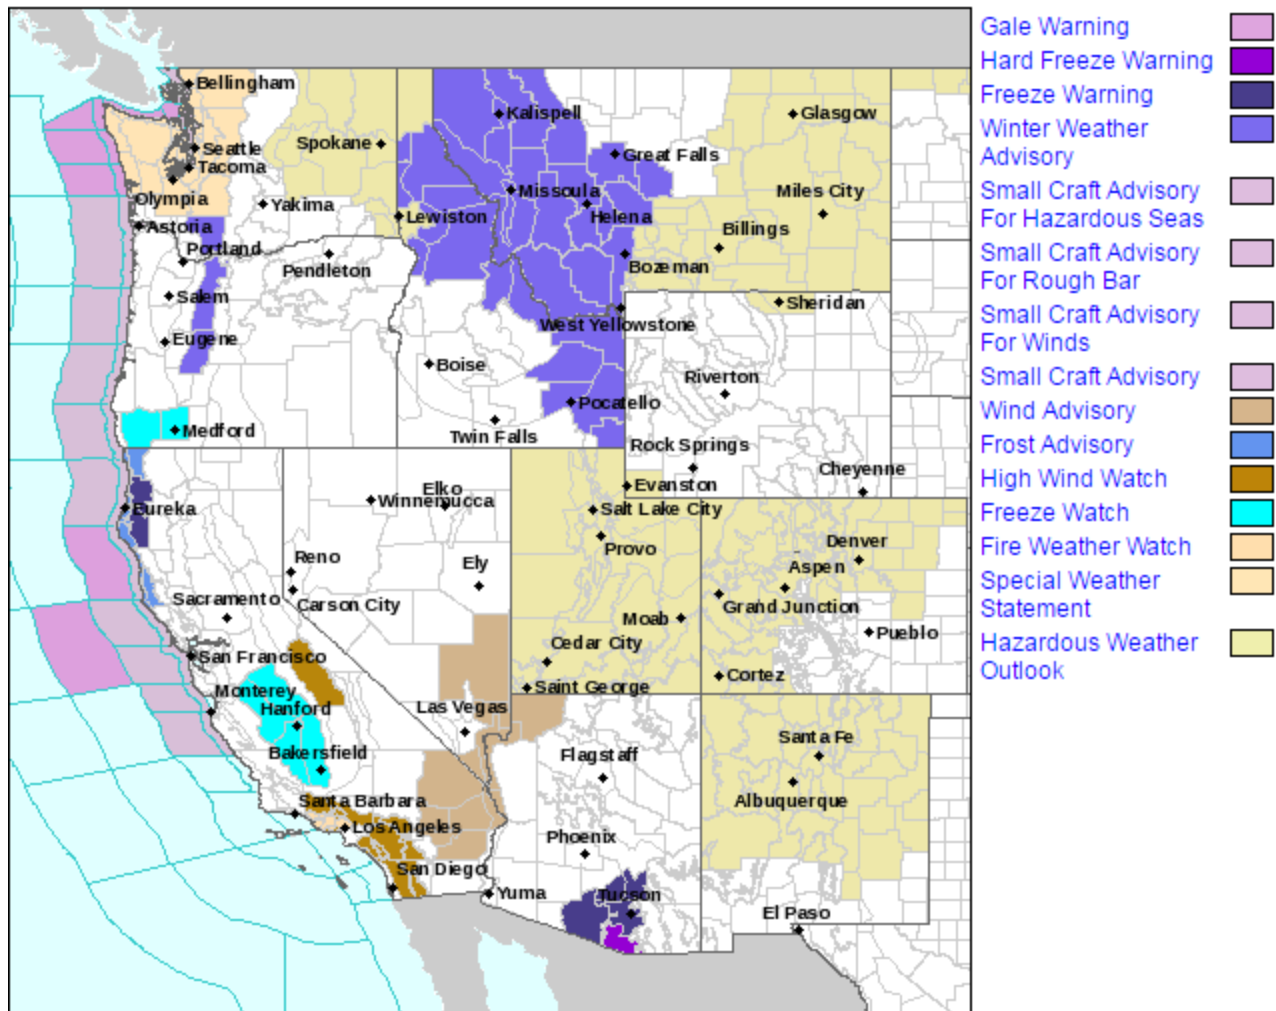

NORTHERN CALIFORNIA

A couple of minor weather systems will keep an unsettled weather pattern going over the region through the weekend. One system is passing through today with some light precipitation, mostly for the northern areas and near the coast. Areas of clearing are expected this afternoon behind the system's passage. High pressure with dry, seasonably mild weather will be over the region Thursday through Saturday, although some high clouds are likely to be seen in that pattern as well. Two more weather systems similar to today's are expected to drop south across the region Sunday and Monday with most of their precipitation likely to be in the northern half of the region and eastern mountains again. Next Tuesday looks dry again before another possible weather system arrives next Wednesday for at the northern areas. The lowest snow levels over the next week will most likely be around 2500-3000 feet in the north and around 3500-4000 feet in the south Sunday and Monday. Some breezy north to east winds are expected to develop later tonight and last into Friday morning for the Sacramento Valley, surrounding foothills and the slopes/drainages west of the Cascade/northern Sierra crest. Lighter north to east winds are expected to prevail elsewhere at that time and in all areas Friday and Saturday. Westerly winds will return after that. Temperatures will be around seasonably cool values for the most part over the next 7 days, and Saturday will likely be the mildest day with many areas 5-8 degrees above normal. That will put the warmest inland locations into the lower 60s Saturday.

SOUTHERN CALIFORNIA

A weak ridge of high pressure over Central and Southern California will maintain near normal temperatures today with 40s to low 50s across the mountains, 50s to low 60s in the valleys of Central California, and 60s to low 70s in the valleys of Southern California. A trough will drop south from Canada Thursday and Friday bringing cooler temperatures both days. Temperatures will be around 10 degrees below normal by Friday. Minimum humidity will be above 20% through Thursday and then drop to 15% to 30% Friday. A ridge of high pressure will bring warmer temperatures along with minimum humidity in the single digits and teens away from the Central Valley and its surrounding foothills this weekend. North to northeast winds of 20 to 40 mph with gusts to 60 mph will surface across much of Southern California Friday morning through Saturday evening. A trough will move inland over the Pacific Northwest bringing significant cooling early next week. Scattered showers with light rainfall totals and low snow levels will be possible across portions of the area early next week. There will be strong west to northwest winds over the wind prone mountain and desert areas Sunday night through Monday night.
